

Communication

Date	26 June 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp / Discord	Team leader	Sync on feature engineering tasks, fix coding blockages, and track daily milestones.
2	Progress Update	Weekly	GitHub / Google Meet	Team leader	Review Flask application routing templates and evaluate machine learning classifier accuracy.
3	Issue / Bug Discussion	As Needed	Slack / GitHub Issues	Backend & UI Developers Team leader	Debug pickle deployment file mismatch frameworks or address data standardizer scaling errors.
4	Stakeholder Review	Bi-Weekly	Zoom / Official Email	Team leader, Mentor, Evaluation	Demonstrate functioning UI frames, model matrix score calculations, and check project milestones.
5	Final Demo Rehearsal	Once	Google Meet	Team leader	Perform an end-to-end sandbox walkthrough of customer application scenario calculations.
6	Documentation Review	Twice	Google Docs	Team leader	Verify report completeness, formatting layout parameters, and placeholder requirements.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Misalignment between UI parameters and backend model array input dimensions.	Established a dedicated technical sync session to document strict JSON schemas mapping directly to app.py variables.

S.No	Challenge Faced	Resolution / Action Taken
2	Delays in updating task status across distributed remote working timelines.	Adopted automated GitHub commit tracking updates broadcasted directly into the main group chat channel.
3	Difficulty interpreting complex ML probability vectors for final review presentations.	Refactored the frontend badge logic to display straightforward, colored categorical labels ("Approved" or "Rejected").
