

Demonstration of Proposed Features

Date	26 june 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Interactive Form UI	Responsive web interface capturing comprehensive user financial parameters and attributes.	Implemented	Yes	Validated entry fields.
2	Data Preprocessing Pipeline	Automated array matrix vector restructuring and feature mapping standardizers using scaler.pkl.	Implemented	Yes	Handles missing parameters cleanly.
3	ML Prediction Engine	Trained binary classification algorithms loading historical structures from fraud_model.pkl.	Implemented	Yes	Instant evaluation logic.
4	AJAX Request Gateway	Asynchronous REST JSON message passing channel routing from view layer to Flask API backend.	Implemented	Yes	Zero reload updates.
5	Dynamic Status Badging	Visually adaptive categorical results output highlighting risk level outcomes (Approved/Rejected).	Implemented	Yes	Immediate view changes.
6	Error Catching Boundaries	Fail-safe runtime check exceptions to intercept unmapped fields or structural array overflow flags.	Implemented	Yes	Robust fallback loops.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
