

Project Demo Planning

Date	26 June 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Intro & Objectives	Brief introduction of the project scope, financial underwriting problem statement, and key target variables.	2 mins	Shaik Ghous unnissa (Solo)
2	Architecture Flow	Explaining the technical design layout mapping HTML web values to the Python Flask engine environment.	2 mins	Shaik Ghous unnissa(Solo)
3	Dataset & Pipeline	Demonstrating the feature selection steps, numerical missing attribute handling, and standardizer logic scaling.	3 mins	Shaik Ghous unnissa(Solo)
4	Core Model Logic	Detailing the binary classification approach used to train and serialize the weights parameters.	3 mins	Shaik Ghous unnissa(Solo)
5	Live Interface Demo	Executing live prediction simulations inside a web browser frame to show classification responses instantly.	4 mins	Shaik Ghous unnissa(Solo)
6	Future Scalability	Wrapping up with systems expansion plans regarding decoupled cloud API routing and retraining iterations.	1 min	Shaik Ghous unnissa(Solo)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Discuss operational credit check processing latencies and model-driven mitigation targets.
2	Solution Overview	Provide a brief walkthrough of the technological framework components (Flask, Scikit-Learn, Pickle binaries).
3	Live Feature Demonstration	Execute full-spectrum candidate scenarios (Approved, Marginal, and Rejected test data paths) on port 5000.

Step	Activity	Notes
4	Q&A Session	Be ready to defend classification model decision matrix boundary layers and parameter tuning steps.
